#### Maturity and repayment considerations

The average life of the series 2022-1 class 1A notes cannot be stated because the actual rate of repayment of the mortgage loans and redemption of the mortgages and a number of other relevant factors are unknown. Calculations of the possible average life of the series 2022-1 class 1A notes can be made, however, based on certain assumptions. The assumptions used to calculate the possible average lives of the series 2022-1 class 1A notes in the following table include that:

- (a) neither the issuer security nor the Funding security is enforced;
- (b) the aggregate current balance of mortgage loans in the mortgages trust will not fall below an amount equal to the product of 1.05 and the principal amount outstanding of all notes of the issuer at any time;
- (c) no asset trigger event or non-asset trigger event occurs;
- (d) no event occurs that would cause payments on the series 2022-1 class 1 A notes to be deferred;
- (e) the issuer exercises its option to redeem each class of the series 2022-1 class 1A notes on the step-up date, if any, relating to such notes;
- (f) the series 2022-1 notes are issued on the closing date specified herein and all notes of any series other than the series 2022-1 notes are at their respective target balances on the note payment date falling in February 2022;
- (g) each payment made by the issuer to the noteholders is paid on the 22<sup>nd</sup> day of the relevant month in which such payment is payable, regardless of whether such date is a business day, and a day count fraction of Act/365 is utilised;
- (h) no interest or fees are paid from mortgages trustee available principal receipts, funding available principal receipts;
- (i) the mortgage loans are not subject to any defaults or losses, and no mortgage loan falls into arrears;
- (j) (provided that such confirmation from Standard & Poor's shall not be required to the extent such rating agency does not maintain a rating of any notes which are outstanding) the long-term unsecured, unsubordinated and unguaranteed debt obligations of the seller continue to be rated at least "BBB+" by Standard & Poor's, the seller continues to have an IDR of at least "BBB+" by Fitch and the seller continues to have a long-term counterparty risk assessment of at least "A2(cr)" by Moody's; and
- (k) no further series of notes are issued after the closing date specified herein.

Assumptions (e) and (f) reflect the issuer's current expectations, although no assurance can be given that repayment of the notes will occur as described. Assumptions (a) through (d) and (h) through (k) relate to unpredictable circumstances.

Based upon the foregoing assumptions, the approximate average lives of the series 2022-1 notes, at various constant payment rates for the mortgage loans, would be as follows:

|  | Possible average life of the series 2022-1 class |  |
|--|--|--|
| Constant payment rate (% per annum) <sup>1</sup> | 1A notes<br>(in years)                           |  |
| 5%   | 4.95   |  |
| 10%  | 4.95   |  |
| 15%  | 4.95   |  |
| 20%  | 4.95   |  |
| 25%  | 4.95   |  |
| 30%  | 4.95   |  |
| 35%  | 4.95   |  |

<sup>1</sup>Does not include scheduled repayments

The average life of each class of the series 2022-1 notes is subject to factors largely outside the control of the issuer and consequently no assurance can be given that these assumptions and estimates are realistic and they must therefore be viewed with considerable caution. For more information relating to the risks

involved in the use of these estimated average lives, see "Risk factors – The yield to maturity of the notes may be adversely affected by prepayments or redemptions on the mortgage loans or repurchases of mortgage loans by the seller" in the base prospectus.

#### The cut-off date mortgage portfolio

The statistical and other information contained in these final terms has been compiled by reference to the mortgage loans in the cut-off date mortgage portfolio as of 31 January 2022 (the "**cut-off date**"). The cut-off date mortgage portfolio comprised an aggregate current principal balance of £4,439,056,009.48. The mortgage loans in the cut-off date mortgage portfolio were originated between 5 November 2002 and 30 September 2021.

A mortgage loan included in the cut-off date mortgage portfolio (and which has not been assigned to the mortgages trustee pursuant to the terms of the mortgage sale agreement) will not be so assigned to the mortgages trustee if, in the period up to (and including) the closing date, it is repaid in full or if it does not comply with the terms of the mortgage sale agreement on or about the closing date, or is a mortgage loan which is a Non Compliant Loan.

In addition to the mortgage loans assigned from the cut-off date mortgage portfolio, the seller is a so expected to assign to the mortgages trustee on the closing date other mortgage loans originated between 27 November 2003 and 30 September 2021. No such mortgage loan will be so assigned to the mortgages trustee if it does not comply with the terms of the mortgage sale agreement on or about the closing date. These mortgage loans have not been included in the statistical and other information contained in these final terms relating to the cut-off date mortgage portfolio. The statistical and other information contained in these final terms relating to the cut-off date portfolio is therefore merely representative of the mortgage loans to be assigned to the mortgages trustee on the closing date.

For the avoidance of doubt, the cut-off date mortgage portfolio includes certain mortgage loans to be assigned to the mortgages trustee between the cut-off date and the closing date.

Once the determination has been made as to the anticipated principal balances of the notes to be issued and the corresponding size of the trust that would be required ultimately to support payments on the notes, the seller will then randomly select the mortgage loans to be assigned to the mortgages trustee on the closing date from the mortgage loans available to be so assigned on such date. It is expected that the aggregate current principal balance of the loans to be assigned to the mortgages trustee on the closing date will not exceed  $\pounds$ 390,666,265.99.

Unless indicated otherwise, the following description relates to types of mortgage loans that could be included in the mortgage portfolio as of the closing date or on any subsequent date.

The borrowers in respect of 95.94% of the aggregate current principal balance of the mortgage loans in the cut-off date mortgage portfolio as of 31 January 2022 have agreed to have their scheduled mortgage payments to the originators directly debited from their bank accounts.

80.48% of the aggregate current principal balance of the mortgage loans in the cut-off date mortgage portfolio as of the cut-off date were fixed rate mortgage loans. The remaining 19.52% of the aggregate current principal balance of the mortgage loans in the cut-off date mortgage portfolio as of the cut-off date were standard variable rate mortgage loans, variable rate mortgage loans, capped rate mortgage loans, discountrate mortgage loans or tracker rate mortgage loans, as described below.

A small proportion of mortgage loans (approximately 0.65% of the aggregate current principal balance of the mortgage loans to be assigned to the mortgages trustee on the closing date) are mortgage loans extended to the relevant borrowers in connection with the purchase by those borrowers of properties from local authorities or certain other landlords under the right-to-buy schemes governed by the Housing Act 1985 (as amended by the Housing Act 2004) or (as applicable) the Housing (Scotland) Act 1987 (as amended by the Housing (Scotland) Act 2001)).

As of the cut-off date, the seller's standard variable rate for existing and new borrowers was 4.49% per annum.

The tables set out under the heading "The cut-off date mortgage portfolio– Mortgage portfolio" in these final terms show statistical and other information relating to all mortgage loans in the cut-off date mortgage portfolio as of the cut-off date.

Columns stating percentage amounts may not add up to 100% due to rounding.

The aggregate current principal balance of all mortgage loans to a single borrower does not exceed 2% of the aggregate current principal balance of all mortgage loans as of the cut-off date.

#### Original loan-to-value ratios

The following table shows the range of original loan-to-value ratios, which express the current balance of a mortgage loan, as at the date of its origination, divided by the value of the mortgaged property securing that mortgage loan at the same date.

No mortgaged property has been revalued since the date of origination of the related mortgage loan other than where additional lending or re-mortgaging has been applied for since the date of origination or where the mortgage loan was a mortgage loan originated by either originator prior to  $10^{th}$  April 2006 (unless originated through the intermediary/broker network) where a self assessment of the property valuation from the potential borrower was used for the valuation of the property, and in applying that self assessment to an LTV calculation, an LTV ratio of less than 75% was determined. In each of the aforementioned cases, the original valuation may have been updated with a more recent valuation, which recent valuation has been used in formulating this data.

# Delinquency and loss experience of the mortgage portfolio (including mortgage loans which previously formed part of the mortgage portfolio)

Since the establishment of the mortgages trust, total losses on mortgage loans in the mortgage portfolio (including mortgage loans which previously formed part of the mortgage portfolio) were £4,644,683 as at the cut-off date.

The following table summarises loans in arrears and repossession experience for mortgage loans in the mortgage portfolio (including mortgage loans which previously formed part of the mortgage portfolio) as at the cut-off date. The seller will represent and warrant on the closing date that no mortgage loan to be transferred to the mortgages trust on the closing date will have experienced any arrears in excess of an amount equal to one month's principal and interest in the prior 12 months. All of the loans in the table were originated by Clydesdale Bank or YBHL. Clydesdale Bank and YBHL service all of the loans that they originate.

The mortgage loans used for statistical purposes in the table below are administered in accordance with Clydesdale Bank's administration policies. The method by which Clydesdale Bank classifies mortgage loans as being in arrears is described in the base prospectus under "*The servicer and the servicing a greement* – *Arrears and default procedures*", and is important in helping to understand Clydesdale Bank's arrears and repossession experience for mortgage loans in the mortgage portfolio as set forth in the following table.

#### Static pool data

This section sets out, to the extent material, certain static pool information with respect to the mortgage loans in the mortgage portfolio.

The issuer has not included static pool information on prepayments in this section, as this information is not separately identified by the servicer. However, prepayment rates in respect of the mortgage loans in the mortgage portfolio are set out in the monthly reports to investors that are prepared pursuant to the servicing agreement.

The sale of new mortgage loans by the seller to the mortgages trustee is subject to conditions, including conditions required by the rating agencies, designed to maintain certain credit-related and other characteristics of the mortgages trust. These include limits on mortgage loans in arrears in the mortgage portfolio at the time of sale, limits on the aggregate balance of mortgage loans sold, limits on changes in the weighted average foreclosure frequency (WAFF) and the weighted average loss severity (WALS), minimum yield for the mortgage loans in the mortgage portfolio after the sale and maximum LTV for the loans in the mortgage portfolio after the sale. See a description of these conditions in "Assignment of the mortgage loans and related security" in the base prospectus.

The following tables show, for each of the last fifteen years of origination, the distribution of loans in the mortgages trust originated in that year by delinquency category as at each year-end starting in December 2007 and as at 30 April 2016, 31 March 2017, 30 September 2017, 28 February 2018, 30 November 2018, 31 January 2019, 30 September 2019 and 31 January 2022.

### Mitigation of interest rate and currency risks

The mortgage loans and the notes are affected by interest rate and currency risks (see "You may be subject to exchange rate and interest rate risks" and "The timing and amount of payments on the mortgage loans could be affected by various factors which may adversely affect payments on the notes" in the Risk Factors section of the base prospectus). Each of Funding and the issuer aim to hedge the relevant interest rate and currency rate exposures in respect of the mortgage loans and the notes, as applicable, by entering into certain swap agreements (see "The swap agreements' in the base prospectus).

Interest rate risks are also managed through:

- a requirement in the servicing a greement that any discretionary rates set by the servicer in respect of the loans are set at a minimum rate (subject to the terms of the mortgage loans and applicable law) (see "*The servicer and the servicing a greement—Undertakings by the servicer*" in the base prospectus), noting that such requirement is contingent upon the seller failing to perform under the relevant swap agreements with respect to the variable rate/standard varia ble rates, being in default or becoming insolvent;
- with respect to tracker rate loans, the interest rate on such loans is calculated by reference to the Bank of England base rate ("**BBR**"), which closely correlates with SONIA rates;
- a requirement in the mortgage sale agreement that any new mortgage loans, product switches or further advances proposed to be included in the portfolio will not cause the weighted average yield of the portfolio (taking into account the swap agreements) to fall below defined thresholds (see "Assignment of the mortgage loans and related security—Assignment conditions" in the prospectus);
- with respect to the issuer, it fully hedges its obligations as the issuer lends the proceeds of any offering of notes to Funding pursuant to the intercompany loan terms and conditions, where the proceeds of sterling denominated floating rate notes are lent on the same terms as the notes with respect to currency and interest rate; and after giving effect to the relevant swap agreements, the proceeds of sterling denominated fixed rate notes and/or non-sterling denominated notes are lent to Funding pursuant to the intercompany loan terms and conditions on the same terms as the notes with respect to currency and interest rate;
- with respect to Funding, Funding obtains its share of revenue generated on a monthly basis from the fixed rate mortgage loans, standard variable rate mortgage loans, variable rate mortgage loans and tracker rate mortgage loans, where with respect to the fixed rate, standard variable rate mortgage loans and tracker rate mortgage loans, Funding has entered into swap a greements, and with respect to tracker rate loans relies on the high correlation between the standard variable rate, and SONIA rates; and
- with respect to the Trust, it does not require any hedging as it distributes the revenue and principal that it receives from the trust property to Funding and the seller or YBHL (as applicable).

Except for the purpose of hedging interest-rate or currency risk, none of the issuer, Funding or the mortgages trustee will enter into derivative contracts, for purposes of Article 21(2) of the UK Securitisation Regulation.

The following tables show the correlation between the interest rates indicated for the period indicated:

### Verification of data

The seller or YBHL (as applicable) has caused a sample of the mortgage loans included in the mortgage portfolio (including the data disclosed in respect of those mortgage loans) to be verified by one or more appropriate and independent third parties. The mortgage portfolio as at the cut-off date has been subject to an agreed upon procedures review on a sample of mortgage loans selected from the mortgage portfolio as at the cut-off date (as well as an agreed upon procedures review, amongst other things, of the conformity of the mortgage loans in the mortgage portfolio with certain of the eligibility criteria (where applicable)) conducted by a third-party and completed on or about 12 April 2022 with respect to the mortgage portfolio in existence as of 31 January 2022 (the "AUP report"). This independent third party has also performed agreed upon procedures in order to verify that the stratification tables disclosed in respect of the mortgage loans are accurate. The third party undertaking the review only has obligations to the parties to the engagement letters governing the performance of the agreed upon procedures subject to the limitations and exclusions contained therein. The AUP report has been filed with the U.S. Securities and Exchange Commission on 13 April 2022 and is publicly available. The originator has reviewed the AUP report of such independent third parties and is of the opinion that there were no significant adverse findings in such AUP report.
